

CAPABILITY STATEMENT

EXPERIENCE MATTERS • ABOUT US

Founded in 2017, TDR Development is one of North America's leading microgrid energy consultants. Our work has been defined by our willingness to partner with our commercial customers to implement energy resilient solutions on time and within budgets.

We design and build client-specific, comprehensive energy strategies and solutions that factor in our clients' goals and objectives. By utilizing our extensive network of suppliers, energy experts and renewable energy partners, we bring the most efficient and innovative technologies to the market.

We specialize in offering not just focused solutions to a specific issue but also broad-based strategic plans to facilitate long-term growth, paving the way for energy independence and autonomy.

CORE COMPETENCIES

- ⇒ Project Management
- ⇒ Design Management
- ⇒ General Contracting
- ⇒ Feasibility Studies
- ⇒ Grid Resiliency & Power Quality Management
- ⇒ Supplier Relationship Management
- ⇒ Targeted Grid Solutions

DIFFERENTIATORS

- ⇒ Grid Consultancy
- ⇒ Grid Design
- ⇒ CHP Power Plants
- ⇒ Co-Generation Plants
- ⇒ Data Center Cooling Solutions
- ⇒ Hybrid Solutions
- ⇒ Power Demand Quality

NAICS

221114	Solar Electric Power Generation
221112	Fossil Fuel Electric Power Generation
221100	Electric Power Generation, Transmission & Distribution
221000	Utilities
236210	Industrial Building Construction
236220	Commercial and Institutional Building Construction

PAST PROJECTS

Power Solutions

- ⇒ Architect of the Capital Power Plant - DC
- ⇒ Howard University Co-Generation Plant - DC
- ⇒ Washington DC Public Schools
- ⇒ US Army Corps of Engineers
- ⇒ NAVFAC
- ⇒ GSA - Washington, DC

US Army Corps
of Engineers®
